

StandUP - *America's Family*

Technology is designed to make life easier and reduce workloads. It all starts with a thought, an idea, and then actions. StandUP Software was created thru this process and today, StandUP is becoming the American Family, working together to bring the People Home.

Here is an overview of the software, how it functions, and why American State Nationals are so excited about this technology.

2 Paths for Status Correction

All people globally can access public records and search for ASN, Notices or Assemblies on StandUP.

First Path - Activate your County Assembly's Land Recording Office at helpus@standup.land

Second Path - People can correct their status directly at www.StandUP.Land by creating their own CYS (Correct Your Status) Account.

- **CYS (Correct Your Status) Document Generator** is for the people to enter their information and self-generate their documents. The system generates the three page 1779 Documents or the 928 Package. The Baby Deeds can be included now or later at no additional charge.

The documents are available for immediate review in email. People have full access to their CYS Account to return and edit the information and they can return anytime in the future to generate additional documents, notices, etc as software is developed. When documents have been completed, the papers are scanned and ready to publish.

StandUp can store records for as long as an Assembly needs, even years, reducing start up costs, & time constraints for launching counties.

- The Land Recording Office (LRO) is the digital file cabinet for all records public and private for the People. Onboard Team and Recording Secretaries work together to review and upload documents. As we say, “it’s so easy a child could do it” gives confidence that any one with basic computer skills will be successful with minimum training and work flow in the LRO. Each County is in charge of their LRO, which means they approve Recording Secretaries and compensation. In addition, the County determines the Recording Fee that includes \$15/status correction to cover software development.

CYS and LRO - Workhorses for Assembly

The CYS creates the documents and the LRO manages the records.

You can start your County as the “last man standing” with only a \$100 set up cost. As others correct their status thru StandUP or your County, people are building the county and the state assembly simultaneously. The amount of training needed is minimum and the **Signal** channel “**Tech Support**” is available if needed.

Tools Package – New Addition

The exciting new developments are Tools that streamline the work within an assembly for Elections, Meetings, and Militia.

- In Elections, the tool “**VOTE**” handles the election process from beginning to the end. For each position, job description, nominations and campaign information, VOTE does the work for the assembly. The system verifies status of each voter and provides the final results of the election with certification and a Public Notice published on the Land Recording Office.
- In Meetings, the tool “**MOTION**” handles the actions of the people. With options for real time motions during an active meeting or as a result of a meeting to vote on a future topic, MOTION is the power and voice of all the people in the assembly.
- In the Militia, the tool “**SKILL**” compiles the expertise, knowledge, and resources of the People for the benefit of protecting life and property in emergencies. Knowing which people can help during disasters is a preparedness plan for the County.

All Tools are accessible thru mobile and desktop and work together with the CYS/LRO. Sold as a package price \$150/year.

30 Days Free

Each StandUP County using the CYS/LRO provide previously status-corrected American State Nationals first 30 days FREE to submit their Record. This provides Onboarding Team and Recording Secretaries the experience and training in their County Land Recording Office.

StandUP is more than a small privately-owned North Carolina software business providing service to the lawful American government. We are a family of American State Nationals and a growing community of self-governing women and men.

Ready to Work

With the need of additional staff to assist people with their status documents, you can apply to join the StandUP Team. This provides training for you while working with StandUP. You gain hands on training and will be ready to start your County's LRO with confidence and experience under the belt.

Publishing Now

People all across America are correcting their status by using the CYS Document Generator. Others that already have their status corrected are publishing their record on StandUP.

Simply stated...StandUP is the People working together to create the kind of world that we wish to live in. Without a lot of pop and circumstance, we are head down, working elbow to elbow, and sharing our skills, resources, and experiences.

Join Signal

You are invited to join the StandUP Family thru the many Signal channels that we communicate on.

The primary Signal channel to join first is the **StandUP County Chat**, where people freely communicate on various topics, share links, make connections, and ask questions about organizing their County. Link for this channel is on the home page of www.StandUP.Land

Other Signal Channels

The many communication channels that StandUP uses to bring People together include:

- ▶ **Lawful Sheriffs**
- ▶ **American Prayer Warriors**
- ▶ **Outreach** – sharing links that assist with bringing awareness
- ▶ **Orientation Team** – creating Orientation I, II, & Advanced
- ▶ **Coffee & Counties** – people focused on County Organizing
- ▶ **Health** – connect & share valuable links about healing & wellness
- ▶ **Public Houses** – available links to join from the website + special benefits

(including **House of Private Farming**, **House of GFG**, **House of Claim Your Inheritance** and others)

Signal is an encrypted app that works like a regular text but also works well for large groups of people. Channels can be **OPEN** for people to share & join while other channels are set to **Private** and join by invitation. Faster and more effective than emails, Signal works on phone or computer, plus synchronizes between the two. Communication is the key.

Bring the People Home

StandUP is an American Family, working and growing together, and building new technology for our lawful American assemblies.

Join in. Grab an oar and row your boat. Focus on what really matters each day.

Self-govern on every level of life and pray for discernment. Never Quit.

Keep rowing... Look up occasionally so that you know when and where to pivot.

There's Hope, there's Freedom, and there's a "Land flowing with Milk & Honey" ahead.

The Bells are Ringing!..... Land HO!!
